

CHART-MASTER™

Decision Resources

Chart-Master is an interactive, menu-driven program that allows users — whether analysts, executives, or secretaries — to produce professional business graphics immediately, with little or no training. Simply enter data, choose options, select a format... and let Chart-Master do the rest. Chart-Master is powerful enough to produce the charts you want, flexible enough to produce them the way you want them, and easy enough to produce them quickly and efficiently. Chart-Master Version 4.1 gives you:

POWER:

- Produces clustered bar, stacked bar, line, pie, and scatter charts
- Plots up to 24 variables (functions) and 600 data points
- Generates charts and signs on paper or transparencies
- Allows production of 35 mm slides (requires modem)

FLEXIBILITY:

- Accepts data manually or from VisiCalc® or other DIF files
- Allows you to locate chart anywhere with up to 9 charts/page
- Plots charts horizontally or vertically
- Offers choice of several character fonts for text

EASE OF USE:

- Guides you through a series of clearly written menus
- Uses default settings for instant production of standard charts
- Includes manual, reference card, and telephone service

Other options include:

- Left and/or right Y-axis, automatic or user-scaled
- Logarithmic Y-axis, regression and curve fitting
- Grid lines, framing and footnote capabilities
- Floating legends — plotted anywhere on the chart

The Options Menu — 8 pages long — offers a wide variety of selections so you can plot the exact chart you want.

Up to 4 pies per chart can be plotted. Values or percentages can be printed in slices. Slices can be "cut out" of pies — maximum of 20 slices per pie.
