

OneStop PC Data Protection

"65% of data is stored on PCs and 92% of users forget or do not backup these files." (Source: IDC, 2001)

CAN YOU AFFORD A SUDDEN LOSS OF YOUR COMPANY'S DATA? ONESTOP PC DATA PROTECTION KEEPS YOUR BUSINESS DATA SAFE AND SECURE.

Cyber terrorism is a reality, causing business owners to review how they protect important company information. Your company's data is a critical asset and any loss can destroy the business. CBE OneStop PC Data Protection helps eliminate the threat and worry. CBE reduces computing downtime and keeps your business up and running. We help protect you from data loss on a 24x7, continuous and managed basis.

ONESTOP PC DATA PROTECTION

Critical business data and files on PCs -- whether departmental desktops or mobile workforce laptops -- are backed up securely over your Internet connection and stored in an off-site data vault location. If a PC is broken, lost or stolen, OneStop PC Data Protection helps recover your information quickly. We'll get you back in business without the worries of lost data and associated expensive downtime.
