

The ProLiant servers listed below are organized into VMotion compatible groups [VMotion to and from any Server/Processor combination within a group]. This grouping list will continue to be updated as new processor and server combinations are released by HP. Please use this document as a guideline with the understanding that new processor releases and processor steppings affect the content and compatibility listed by this document.

For additional information regarding VMotion compatibility, please see the following VMware Knowledge Base Articles:

Intel VMotion – KB 1991

AMD VMotion – KB 1992

VMotion SSE3 Mismatch Information – KB 1993

Group 1
