

# HP StorageWorks Enterprise Backup Solution (EBS) Hardware/Software Compatibility Matrix

December 2006 Version 1.1

## Start Here

### Key Updates:

- New Partner: SGL FlashNet
- Latest ProLiant Storage Server platforms added
- Library firmware updates
- Windows x64 support for Tivoli Storage Manager
- ATTOTech SCSI HBA LINUX support
- Support for Emulex Multipulse (multipath for LINUX)
- Significant interoperability updates throughout

## How To Use This Document

The **HP StorageWorks Enterprise Backup Solution (EBS) Compatibility Matrix** provides information for designing data protection solutions, including backup/restore and archiving, that scale from entry-level workgroups to enterprise-level datacenters. It includes support for Direct Attach SCSI (DAS), Direct Attach Fibre (DAF), and Storage Area Network (SAN). It does not imply product availability. Products **highlighted in yellow** will be removed from the EBS Compatibility Matrix in the next release. Previous versions of the EBS Compatibility Matrix are available on the web at [www.hp.com/go/ebs](http://www.hp.com/go/ebs).

HP partners with leading application and product vendors to provide backup/restore, archiving, and data security solutions. See below for information on the Extended Solution Interoperability (ESI) and Tape Automation Compatibility (TAC) categories:

**Extended Solution Interoperability:** HP performs on-going interoperability and extensive solution testing with these applications to provide fully certified and supported data protection solutions that include HP tape libraries, autoloaders, and virtual library systems. See the [Libraries and Partner Products](#) page for compatibility information. Extensive solution details including operating system details, host bus adapter and driver information, SAN infrastructure, and extended tape library feature support can be found throughout this document.

**Tape Automation Compatibility:** These products are verified for compatibility with HP tape libraries, autoloaders, and virtual library systems. See the [Libraries and Partner Products](#) page for compatibility information. Consult the product compatibility guide(s) for additional support details such as product version information, driver details, firmware revisions, patch levels, etc.

Additional technical information can be found in the Enterprise Backup Solution Design Guide and various Backup Application Implementation Guides located on the web at [www.hp.com/go/ebs](http://www.hp.com/go/ebs). For information on stand-alone tape products and compatibility, go to [www.hp.com/go/connect](http://www.hp.com/go/connect).

NOTES: section contains specific configuration details

**NOTES:**  
1) Other Operating Systems may be supported within EBS by the respective ISVs as LAN clients.  
2) Please reference your ISV support matrices for supported application and operating system version compatibility.  
3) ATS is not supported.

4) Refer to [EBS Design Guide](#) for configuration rules and guidelines.  
5) For Boot from Tape support, [click here](#), and select the type of tape for compatibility.  
6) Refer to the [EBS Design Guide](#) for details on failover configurations. For Operating Systems not listed, please refer to the ISV's web page for supported High Availability configurations.

NOTES:  
 1) See "How To Use This Document" for description of support.  
 2) WORM (Write-Once, Read-Many) implementation is dependent on the backup application.  
 3) Minimum supported version is 1.0.4.  
 4) Autoloaders are only supported in Direct Attach SCSI configurations.  
 5) Ultrium drives are not supported with ESL9198 and ESL9326 libraries

6) Refer to the EBS Design Guide for additional information on the use of native backup commands and programs.  
 7) Symantec Backup Exec 10.d requires the QLA4050C-CK or QLA4050C-BK PCI-X iSCSI Host Bus Adapter to be installed in each Windows server that will connect to the VLS1000i.  
 8) Supported with Windows 2003 (32bit) only using the native Microsoft iSCSI initiator or QLogic 4050c iSCSI HBA.  
 9) Not supported with Symantec Backup Exec for NetWare (BENW)

10) Autoloaders, MSL 2024, and MSL 4048 are not supported with SMART Array Controllers.  
 11) Requires connectivity of tape library to HP Virtual TapeServer for NonStop Systems.  
 12) Support is only with MSL 6026 and MSL 6030 models.  
 13) Support is with LTO emulations only.  
 14) Support is with the NeoScale CryptoStor Tape 700 Family only.  
 15) Refer to vendor for software application and additional hardware interoperability support.

**NOTES:**

- 1) Refer to [EBS Design Guide](#) for configuration rules and guidelines.
- 2) Refer to the [EBS Design Guide](#) for details on failover configurations. For Operating Systems not listed, please refer to the ISV's web page for supported High Availability configurations.
- 3) Supported on Windows 2000 only.
- 4) Support includes NAS9000 and NAS4000 platforms.
- 5) Windows Full-Feature MPIO failover support. Clusters sharing disk and tape on the same HBA require StorPort.

- 6) 3rd Party adapters require HP drivers and firmware.
- 7) All applications except Tivoli require updated Storport.sys KB891793 (minimum) or KB916048 (recommended). Tivoli configurations require Storport.sys KB901371.
- 8) Please reference ISV application installation/support documents for specific driver and patch requirements.
- 9) Supported for tape connections only.
- 10) Not supported with TSM 5.3.x.

Secure Path for Linux	3.0C		3.0C			3.0C SP2

**NOTES:**

- 1) Other Operating Systems may be supported within EBS by the respective ISVs as LAN clients.
- 2) Please reference your ISV support matrices for supported application and operating system version compatibility.

- 3) EBS is not dependent on specific kernel errata levels. For required/supported kernel errata, refer to your online storage array and backup application support documentation.
- 4) Refer to [EBS Design Guide](#) for configuration rules and guidelines.
- 5) Due to tape device discovery issues, SP2 for SLES 9 is not supported.

Multi-Protocol Router <sup>2,3</sup>	7.4.1b	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
IP Storage Router 2122-2 <sup>4</sup>	3.4.5c	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓

**NOTES:**

1) Refer to [HP StorageWorks SAN Design Reference Guide](#) for configuration rules and guidelines

2) Supported with all backup application/operating system combinations.

3) Supported as a SAN-to-SAN interconnect only. Direct connection of libraries or hosts to the MP Router is not supported.

4) Supported for FC-IP SAN-to-SAN interconnect only.
