

Compaq ActiveAnswers

for ISS Internet Scanner and ISS RealSecure

Protect your network from intrusions

Compaq ActiveAnswers is a unique online knowledge repository and virtual community that simplifies and standardizes enterprise solutions by providing tools, guides, e-services and technical information from Compaq and its partners. The tools you'll find on ActiveAnswers will help you achieve solutions success with reduced cost, risk and time.

From Internet, e-commerce and enterprise applications to data management, business intelligence, messaging and collaboration and more, on Compaq ActiveAnswers you'll find solutions for just about any IT challenge. Whatever your questions, we have the answers.

Keeping your network secure against hackers is important to maintaining the integrity of data and the privacy of information. Establishing an effective enterprise security program, based on a multi-layered security policy which addresses intrusion detection and vulnerability assessment, can help you recognize and mitigate these risks.

Compaq and Internet Security Systems (ISS), a leading provider of adaptive network security software, have been working together to test and integrate Compaq hardware with ISS software to provide industry-leading solutions to manage security risks. ISS Internet Scanner and

RealSecure are robust tools for identifying and addressing key vulnerabilities on your network. ISS Internet Scanner scans and detects vulnerabilities at every network node and generates a wide range of reports to help eliminate security risks. ISS RealSecure provides unobtrusive surveillance across the enterprise, allowing administrators to automatically monitor network traffic and detect and respond to suspicious network activity before systems are compromised.

Compaq and ISS have collaborated to create ActiveAnswers for ISS Internet Scanner and ISS RealSecure to simplify the implementation of ISS's products on Compaq servers in an enterprise-computing environment. These ActiveAnswers solutions provide information and methodologies for planning, deploying, and operating intrusion detection and vulnerability assessment solutions for your network — all in one centralized, dynamic source.

How will it make a difference?

Faster time to solution

ActiveAnswers provides a faster and easier way to plan, deploy and maintain your intrusion detection and vulnerability assessment solution through the entire lifecycle. By reducing implementation time and eliminating guesswork, you're up and running faster.

Increased confidence

The recommendations and best-practices are based on extensive integration and performance testing by Compaq and ISS enabling you to implement the solution quickly and confidently by reducing the risks of trial-and-error implementation.

Reduced risk

You can avoid errors, false starts and guesswork by using the proven step-by-step guides found on *ActiveAnswers*. These guides jointly developed by Compaq and Internet Security Systems (ISS) enable you to reduce risk and deploy faster.

What will you find?

With Compaq products and the power of *ActiveAnswers*, you can achieve a real edge when it comes to planning, deploying and operating your intrusion detection and vulnerability assessment solution.

A sample of the solution enablers found on *ActiveAnswers* include:

- ➔ Primers that describe the key points of vulnerability assessment and intrusion detection
- ➔ Planning, deployment and operations guides for ISS Internet Scanner and ISS RealSecure on *Compaq ProLiant* servers
- ➔ Recommended configurations for ISS Internet Scanner and ISS RealSecure to simplify the hardware and software selection process

- ➔ Installation procedures for ISS Internet Scanner and ISS RealSecure on *Compaq ProLiant* servers that note significant steps necessary for a successful implementation
- ➔ References to ISS's hot fixes and updates to keep software current and simplify the operations process

Comprehensive service and support

ActiveAnswers online content support addresses specific questions about using *ActiveAnswers* features. And *ActiveAnswers* online operations support addresses general site issues or questions about:

- ➔ Page links
- ➔ Web response times
- ➔ Password administration
- ➔ Content errors and omissions
- ➔ Site availability

Where do you start?

Just visit www.compaq.com/activeanswers to register and browse the wide array of solutions, community features and services you'll find there. It's free, and there's simply no better way to implement an intrusion detection and vulnerability assessment solution for your network.
