Top Gun puts you in the fighter pilot's seat of an F14 Tomcat. 3-D vector graphics and split screen display allow one or two players to combat head to head or against the computer. Your armaments in this nerve tingling aerial duel are heat seeking missiles and 20mm rapid fire cannon. Many skills have to be brought in to play such as reflexes, manoeuvring ability and accuracy to become the best of the best. Top Gun mavericks enter the danger zone!

GAMEPLAY

You are Maverick, a top fighter pilot in the American Navy, your craft the F-14 Tomcat. It is a fast and deadly aeroplane equipped with different weapons and defence systems. Choose to combat against the computer controlled aircraft or go head to head and battle it out

In 2 player mode — out manoeuvre your opponent and shoot him down with a direct hit from one of the missiles or a succession of shots from the machine guns.

In one player mode you must engage and destroy three enemy aircraft before progressing to your next mission — pitting you against faster and more manoeuvrable craft. With two players you each begin with 3 aircraft and the winner is the one left flying.

WEAPON SELECTION

There are 3 weapon types which are selected in weapon mode. This is denoted on screen by a variation in the shape of the sights on the main display and the relevant letter is highlighted on the console.

Cross Hair — Machine Gun/Cannon
Square Sight — Side winder missile
No Sight — Flare mode

The radar readout indicates the relative position of your enemy aircraft and the arrow indicator denotes that it is above or below you.

Yellow warning light means that the enemy has you in their missile sight and the red warning light when a missile has been launched at you.

MACHINE GUN/CANNON

This can be operated when the enemy aircraft is in your sight — 25 direct hits are required to down it. A hit is denoted by a border flash and visual reference on the damage indicator. Heat levels of the weapon are displayed on the control panel.

SIDE WINDER MISSILES

To fire a missile it is necessary to fix the opponent directly on your sight for 3 seconds which enables the heat seeking element to "Lock-On" to the aircraft; However one direct hit is fatal!

FLARES

The flare is used as a decoy and is your only defence to the side winders, they must be used skilfully and with precision timing or the effect will be lost. The flare must be launched so that the enemy missile 'thinks' the ultra high-heat magnesium flare is the jet exhaust, this way you can escape the deadly shot.

Missiles can also be out manoeuvred by a skilful pilot (they "burn-out" after about 20 seconds) and a combination of moves and the astute use of flares should enable you to avoid destruction. Good luck as you enter the Danger Zone!

HINTS AND TIPS

1. Use the machine gun sparingly, they may overheat and jam if fired continuously.
2. Try to position your craft behind the enemy — this is when he is at the most vulnerable and will find it difficult to shake you off.
3. Use the machine guns for short range and the missiles for long range attacks.
4. When banking use climb to achieve a greater rate of turn.
