WINTER OLYMPICS

This superb sports simulation allows you to compete against the computer and the clock in six challenging winter sports events.

- **SPEED SKATING**
- **SKI-JUMP**
- **SKI-SLALOM**
- **CRESTA RUN**
- **SKI-DOWNHILL**
- **CURLING**

WINTER OLYMPICS

LOADING: Press CTRL key and small ENTER key together with the following prompts.

EVENT 1 - SPEED SKATING

Press P for Practice or H for Heats. Controls A and D control the competitor's skates. Start off slowly gaining speed as you go, quick movement of the keys will cause him to slip on the ice and lose speed. Your computer pacer is there to help you gain that fastest time of the day.

EVENT 2 - SKI JUMP

Controls A and D. Space Bar - Jump. Pressing A and D keys quickly will propel your skier down the slope. As he nears the end of the slope, press the Space Bar for a safe successful jump. To score maximum points gauge your take off position carefully. Too early will shorten your jump, too late and it's disaster.

EVENT 3 - SKI SLALOM

Controls A moves skier left, D moves Skier right. Press Space Bar to start your run, then guide your skier through the gates. If you miss or hit the gates you are disqualified for that heat.

EVENT 4 - CRESTA RUN

Controls: Space Bar will start your descent down the Cresta Run. As you ride through the corners your speed will pick up considerably. A and B (left and right) compensates your body leaning, helping to keep your sledge within the ski banking.

Too much correction will slow your speed down while too little correction will allow you to go into a corner too quickly then it's away off into the tree for you!

EVENT 5 - SKI DOWNHILL

Controls: Same as Event 3. The downhill course has no gates but watch those trees!

EVENT 6 - CURLING

Controls: A moves player left, D moves player Right. To throw your Stone hold the FIRE BUTTON/large ENTER KEY down until the player's arm rises to the desired position and you release the Stone by releasing the FIRE BUTTON/large ENTER KEY.
