Setup Utility

When you power on your NetVista thin client for the first time, the Setup Utility automatically starts.

You can perform the following configuration tasks in the Setup Utility:

- Select the keyboard language
- Select the display resolution and frequency
- Configure the IP settings

For more information on the Setup Utility, refer to the online publication for your NetVista thin client.

Configuration Tool

During the initial configuration of your NetVista thin client, the Configuration Tool appears after you complete the Setup Utility.

You can perform the following configuration tasks in the Configuration Tool:

- Set one or more applications to run automatically at startup
- Set a launch bar with applications that you can run

You can also configure the following applications in the Configuration Tool:

- ICA Client
- ICA Remote Application Manager
- 3270 emulator to S/390 hosts
- 5250 emulator to AS/400 hosts
- VT emulator

To access the Configuration Tool after you completed the initial configuration, press the SHIFT-CTRL-ALT keys on the left side of your keyboard until the Configuration Tool appears.

For more information on the Configuration Tool, refer to the online publication for your NetVista thin client.

Online publication

You can find the online publication, *NetVista N2200e, Thin Client Express Reference* (SA23-2803-00), at the following URL:

<http://www.ibm.com/nc/pubs>

The online publication provides the following information about your NetVista thin client:

- Detailed hardware specifications
- Configuring the NetVista thin client
- Upgrading your software
- Resolving problems
- Replacing hardware parts
