IBM®   # Technical Update

Important information about xSeries 255 Type 8685 server

This Technical Update provides additional information about IBM Director Version 3.1 that comes with your server.

If you plan to enable the Automatic Server Restart (ASR) feature and install the IBM Director application on your server, you must first install the ASR device driver that is available from the IBM Web site; then, install the IBM Director application and the appropriate Director System Support Package (DSSP) for your server.

To obtain the ASR device driver, go the IBM Web site at http://www.ibm.com/ and click **Support & downloads**. Then, type *Advanced System Management 8685* in the Technical support database search field to locate the IBM Advanced System Management Device Driver Diskette for Microsoft Windows 2000 and Windows NT 4.0 Version 2.07 or later. Follow the directions in the README file for installation instructions.

When you install IBM Director 3.1, you must obtain the latest updates for IBM Director that are available on the Web. Go to the IBM Web site at http://www.ibm.com/ and click **Support & downloads**. Then, type *Director 8685* in the Technical support database search field to locate the Director System Support Package for your server. Follow the directions in the README file for installation instructions.
