

Continuation 4th

July 16, 1975

Special Issue

The contents of this 'special issue' will be repeated in the normal 120 issues to be mailed the last week of July.

NEW SYSTEM AVAILABLE

The Sixth Edition - June 1975 of the UNIX system is now available for distribution to licensees. Commercial users should write to AT&T, Electric for details. Academics can receive the new system for a special price of \$150.00. Normal distribution is on 800 baud - 9 track tapes. You will need a tape unit & check for \$150.00 addressed to:

C. W. Christy, Jr.
Room 4013
Beverly Hills, N. 07724

The UNIX system is a single file which contains a complete UNIX environment. It contains:

- 1) The system manual and distribution
- 2) Source code
- 3) Documentation in both machine-readable and human-readable form

Commercial users should write to AT&T, Electric for details. The package also includes the source code for the UNIX system.

Here are the new 'products' etc:

- 1) Separate I and O tapes for the 11/45s and 11/70s
- 2) New files up to 16 megabytes
- 3) A processor for structured PASCAL
- 4) TSP
- 5) A processor for 3D with an editor
- 6) New files and utilities of source code for the 11/45 and 11/70
- 7) Full source of programs embedded in the 11/45 and 11/70
- 8) New kernel with an editor and 11/45 and 11/70

UNIX 6.0

The UNIX system is a single file which contains a complete UNIX environment. It contains:
